

8.3 What Helps My Body Relax?

Discovering which small actions help me unwind and feel calmer.

1. What does my body need right now?

What signals is my body giving me right now?
What is it asking for?

2. Small things that help me relax

Write small actions that usually help
you feel better or unwind.

3. What helps less?

What usually does not calm you, or may even
make it harder? (thoughts, habits, places, screens,
and more)

4. My personal relaxation list — mark what fits you ☒

writing

☐

talk with someone

☐

other

5. What will I choose to try today?

Choose one action (or more) that feels helpful.
When will you try it? Where? With whom?

6. How will I know it helped a little?

How will I feel? In my body,
mood, or thoughts?

Even a small relief is progress.
